This Week's Turkey Feature Highlights

Retail feature activity declines as stores begin to focus on more traditional Memorial Day items. A few more stores are offering frozen whole turkeys; prices are higher on toms this week. Fewer retailers are promoting bone-in breasts; prices are higher on fresh and frozen bone-in breasts. Feature activity continues very light on rotisserie breasts. Offerings decline on boneless white parts; prices are mostly lower. Marinated tenders are getting the most ad space this week and are the only boneless white part with higher prices. Offerings slow on dark parts and are mostly centered on fresh drums. Ground turkey promotions decline; the weighted average price increases. Almost half the feature activity is on 93% lean. A large number of stores are promoting ground turkey rolls; offerings also increase on specialty grinds. Deli turkey promotional activity is sharply higher, mostly due to very active featuring on self- service deli. Service deli featuring is most active on thick slicing meats. Self-service deli prices are mixed on processor brands, higher on private brands.

All report information gathered from publicly available sources including store circulars, newspaper ads, and retailer websites.

1/ Feature Rate: the amount of sampled stores advertising <u>any</u> reported turkey item during the current week, expressed as a percentage of the total sample. 2/ Activity Index: a measure of the absolute frequency of feature activity equal to the total number of stores for each advertised turkey item (e.g., a retailer with 100 outlets featuring 3 turkey items has an activity index of 300). 3/ Stores/Avg: the total number of advertising outlets and the weighted average price weighted by the respective number of outlets. 4/ Special Rate: the percentage of sampled stores with a no-price promotion (e.g., buy 1, get 1 free, etc.) 5/ Specialty: products produced from birds raised on an all vegetable diet without antibiotics and minimally processed.
